Hikvision advanced replacement policy. All Hikvision products (excluding PTZs) purchased after September 2016 are covered by a 3-year warranty (2 Year warranty on Switches & Intercom products). Once a product has been identified as potentially faulty by our technical department, it is then eligible for advance replacement for a 3 year period from the initial date of purchase. After 3 months from shipment date, Fortus UK reserve the right to use a refurbished/service product for the remainder of the warranty period. Any specialist items purchased at a customer's request, customised items, non-stock items and PTZs are covered by a 3 year-warranty but are exempt from the advanced replacement offer and will to through the standard warranty repair service. An advanced replacement is given based on the diagnosis of the technical department derived from the information given by the customer on site and is not an admission that the product is faulty. A fault can only be determined once tested by Fortus UK and we reserve the right to return any items deemed not faulty. You will be invoiced for the advanced replacement via your credit account if one is in place, otherwise the replacement item would be required to be paid for prior to sending out. Any faulty item(s) that get advance replaced must be returned to Fortus UK within 14 days of receiving a replacement. Any items returned after this time will be treated as a warranty repair and returned thereafter. After the returned product has been tested and if the fault is agreed a credit note will be raised.
